Grounding connection is obtained by contact surface between starter and Flywheel housing, clean this surface contact to confirm ground connectivity.

When you install "No (B- / E) terminal starter type" in old version, please remove or insulate Ground cable to avoid any risk of contact with Positive Terminal around (Starter SW and environmentl parts)

The starters with (B- / E) Terminal Starter and No (B- / E) Terminal Starter are inter-changeable.

La conexión a masa se obtiene a través de la superficie de contacto entre el arranque y la carcasa del volante motor, limpie la superficie para que pueda haber una buena conexión a masa.
